SAMPLE FUEL MIX CONDITIONING DRILLS FOR RUGBY LEAGUE

These drills are not an exercise prescription but a list of drills that may be used to develop fuel mix fitness.

SETS, REPS. AND REST

The sets, reps., and rest times are provided as examples only. They all follow the principle of 3 sets of 5 reps., with 30s rest between reps. and 2 minutes rest between sets. This is a typical fuel mix system that will challenge both aerobic and anaerobic energy sources. If you wish to increase the running speed of these drills, simply increase your rest time between reps. and sets.

WEARING A WEIGHTED VEST

To increase the demands of these drills you may also want to consider wearing a Reebok weighted vest. Alternate between performing a drill with then without the vest. For more information visit the www.fitness4rugbyleague.com home page where the vest is a featured product.

RECORD YOUR TIMES

We recommend that you time yourself for each interval and maintain a record of these times for comparison and to set yourself targets.

WARM UP THOROUGHLY BEFORE PERFORMING THESE DRILLS
